INDICAÇÕES

<p>Trilho recomendado</p> <p>32,9</p> <p>36</p> <p>Código Joelini PFM-612</p>	<p>Espessura mín. da porta</p> <p>18mm</p>	<p>Largura mínima de porta</p> <p>650 mm</p>	<p>Descontos</p> <p>V</p> <p>P = V - 65mm</p>	<p>Para Portas até 60kg</p>
--	---	---	--	------------------------------------

Cálculo da Porta

$$P = V - 65\text{mm}$$

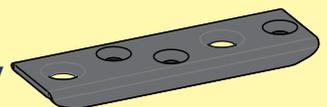

$$P = V + 65\text{mm}$$

Exemplo:

Já tenho o Vão: Preciso da Altura da Porta
 $P=V-65\text{MM}$

Já tenho a altura da Porta: preciso do vão
 $V=P+65\text{MM}$

Obs. Quando for usado o suporte de topo embutido, considerar 45mm no cálculo.

Porta

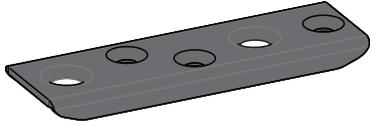

Kit Amortecimento duplo

Kit Amortecimento Simples

Largura Mínima da Porta

	Suporte	Suporte Sobresposto	Suporte Embutido
Kit			
Kit Amortecimento duplo		650mm	700mm
Kit Amortecimento Simples		500mm	550mm

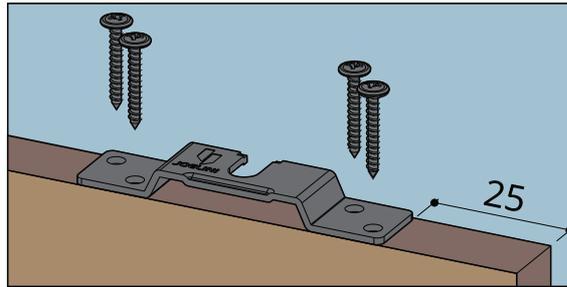

Obs. Proporção da porta não pode passar de 3:1
Ex. Largura 500mm, altura máxima 1500 mm

Preparar Porta

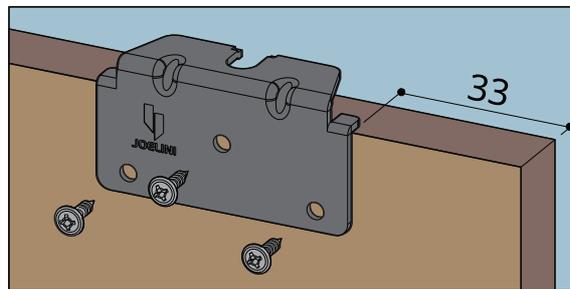

Tipos de Suporte:

**SUPOORTE
TOPO**

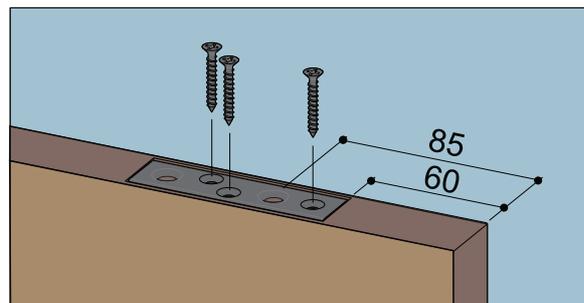

**ITEM INCLUSO
NO KIT**

**SUPOORTE
LATERAL**

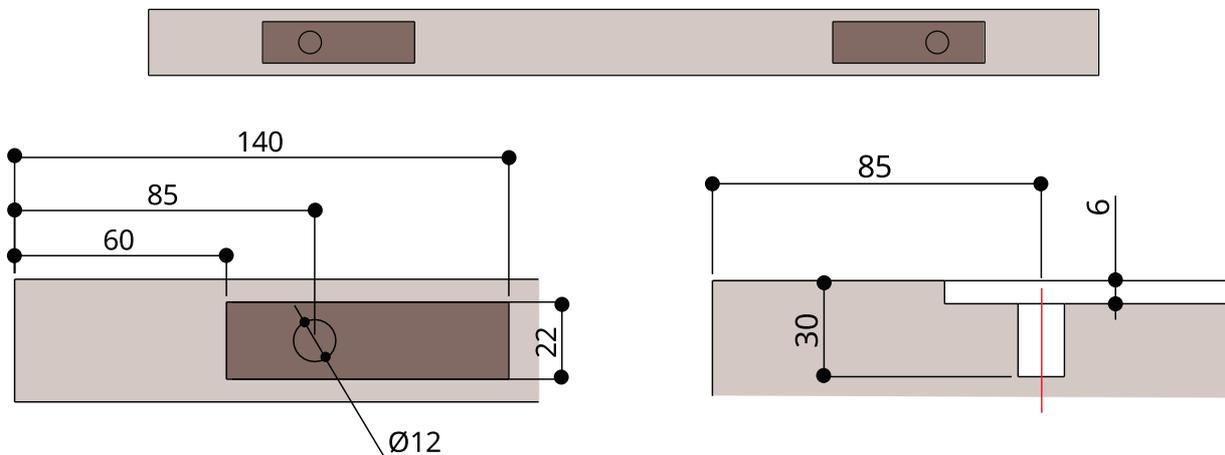

**ITEM
OPCIONAL**

**SUPOORTE
TOPO EMBUTIDO**

**ITEM
OPCIONAL**

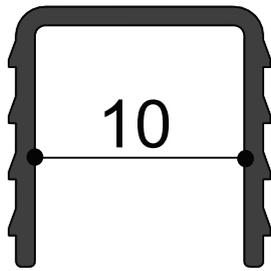

Obs. Esse suporte necessita usinagem no topo da porta

Preparar Porta

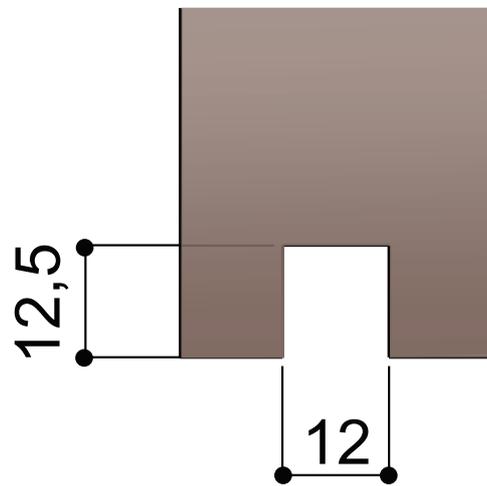

Usinagem inferior:

Perfil Indicado

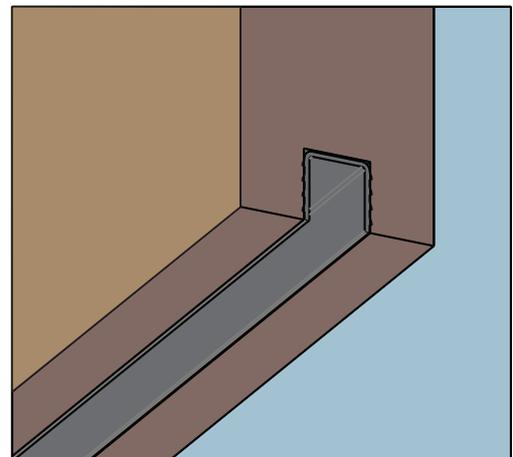

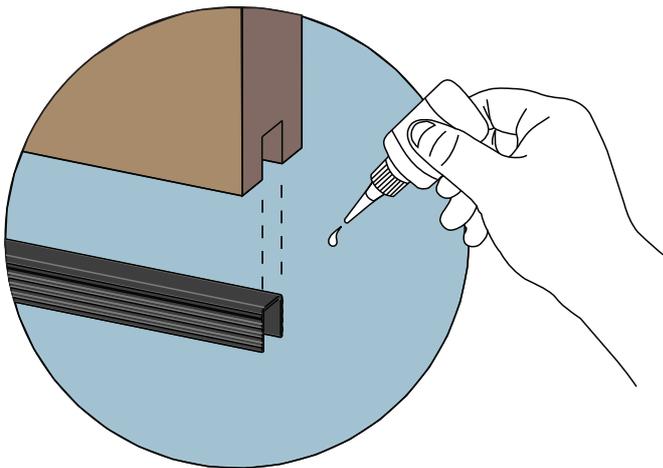

PFM - 603

Usinagem da porta

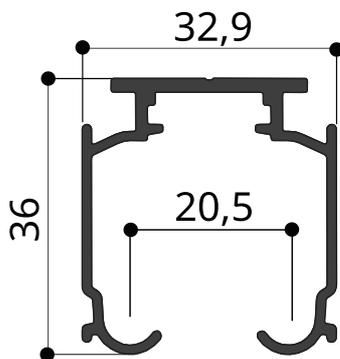

Colar trilho inferior

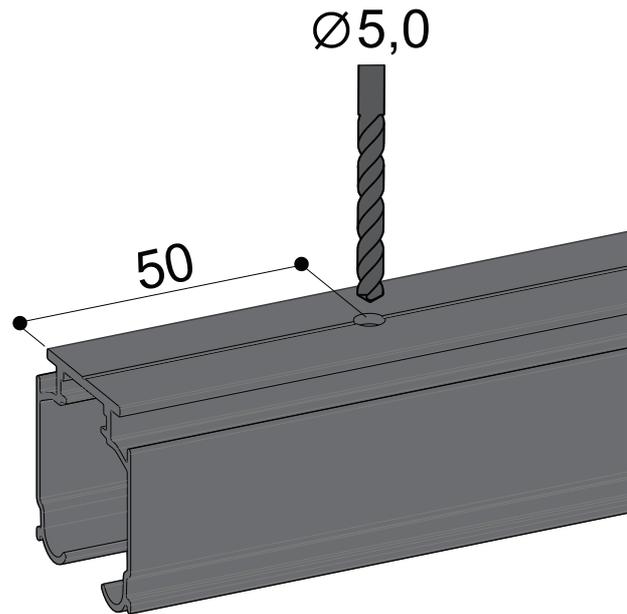

Preparar trilho

Fixação interna:

Perfil indicado

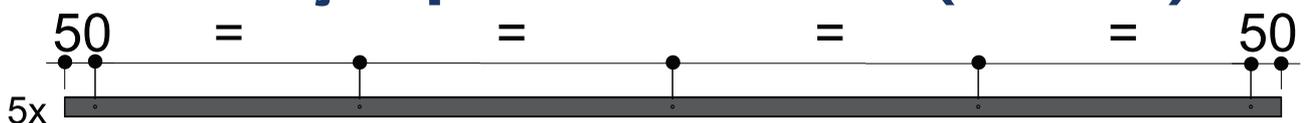

PFM - 612

Furação para "trilho 2m" (4 furos)

Furação para "trilho 3m" (5 furos)

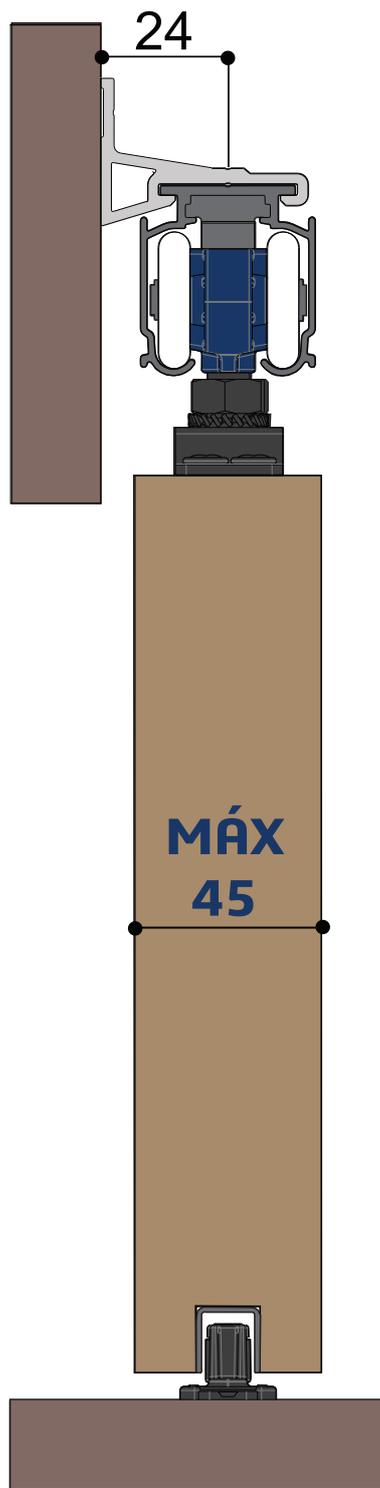

Item opcional: Fixação externa

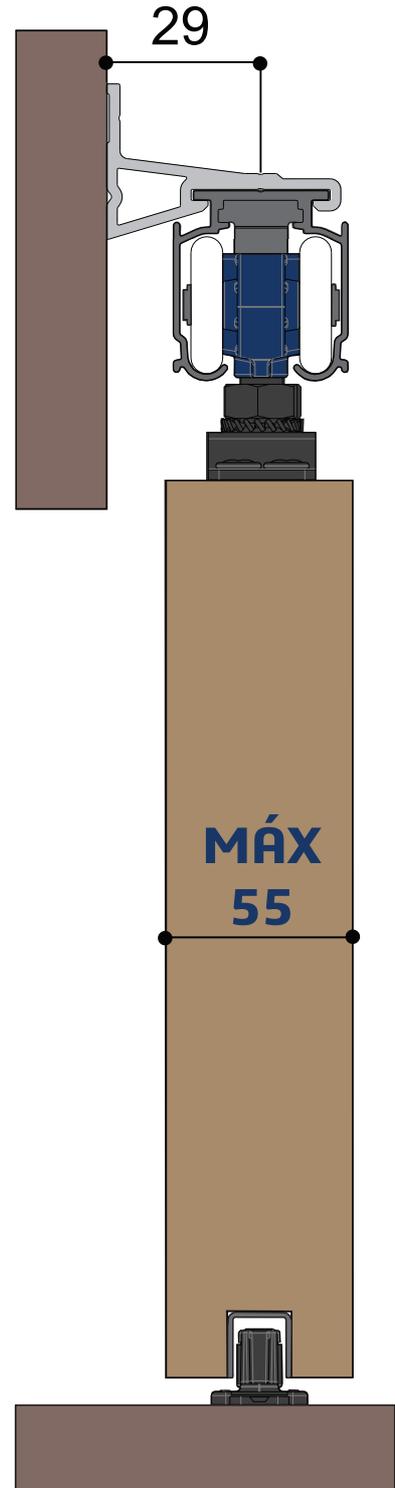

Suporte baixo

Suporte médio

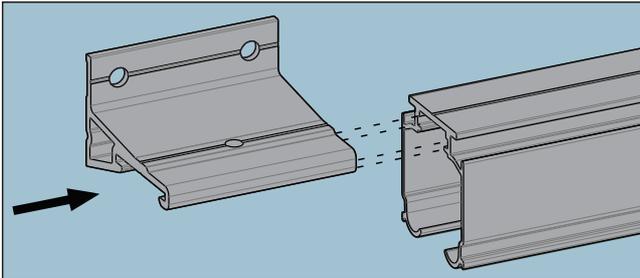

Suporte alto

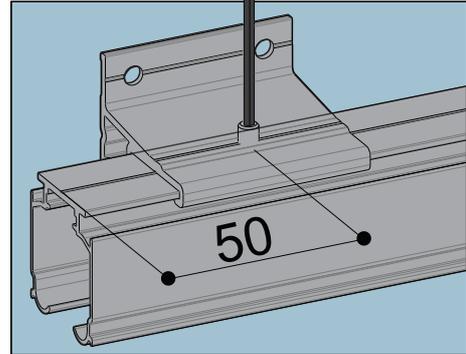

Montagem do suporte

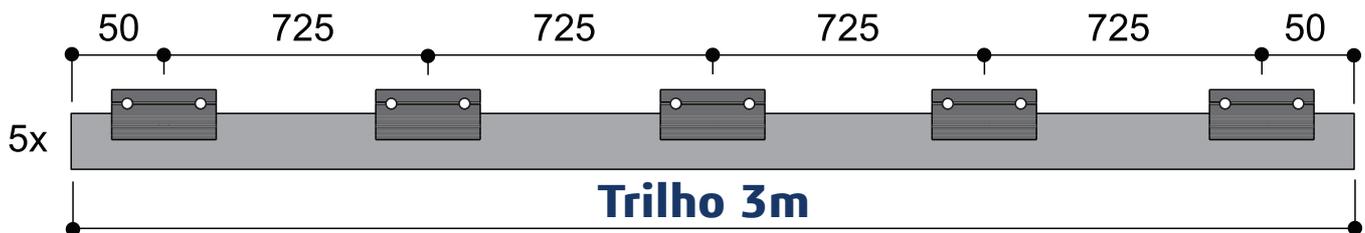

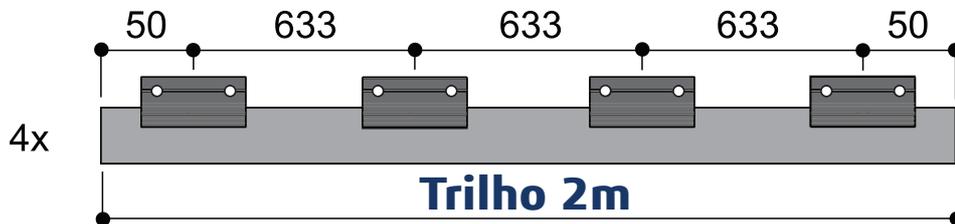

1- Montar

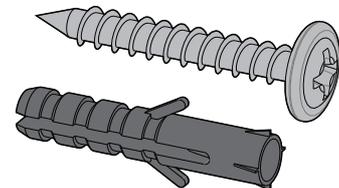

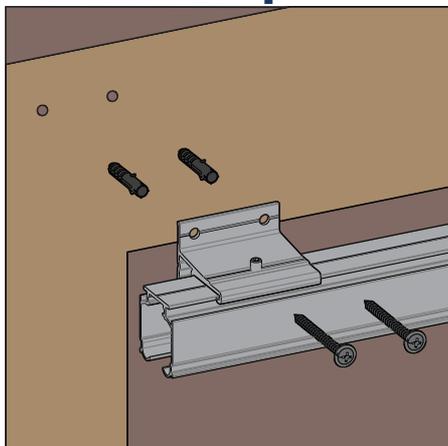

2- Travar

Afastamentos

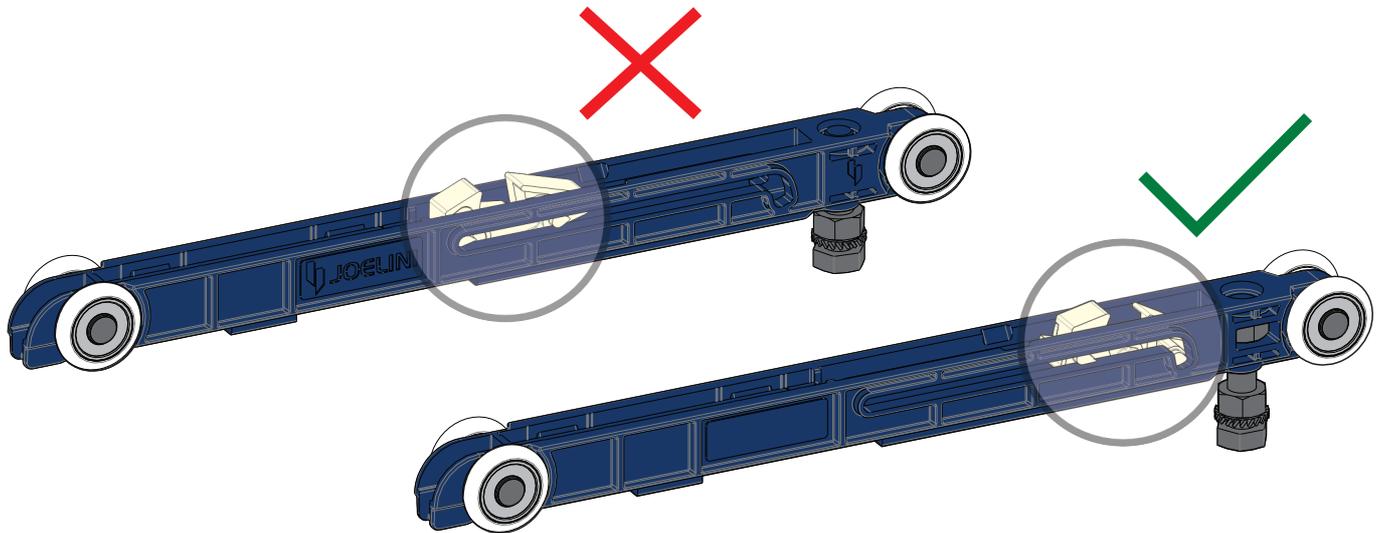

3- Fixar na parede

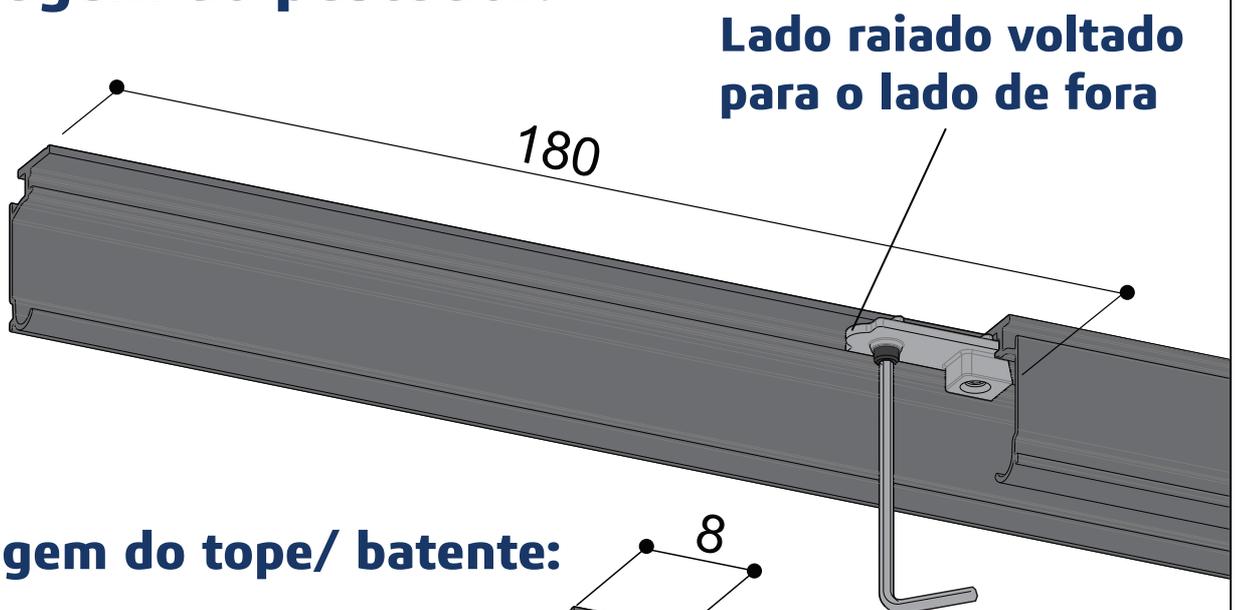

Parafuso CF 4,5X50
Bucha N6

Montagem ferragem no trilho

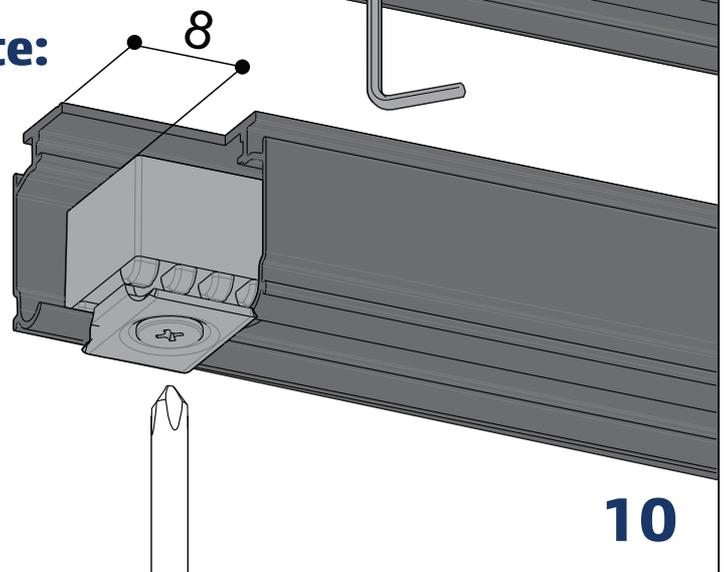

Fazer a montagem com o gancho armado:

Montagem do pescador:

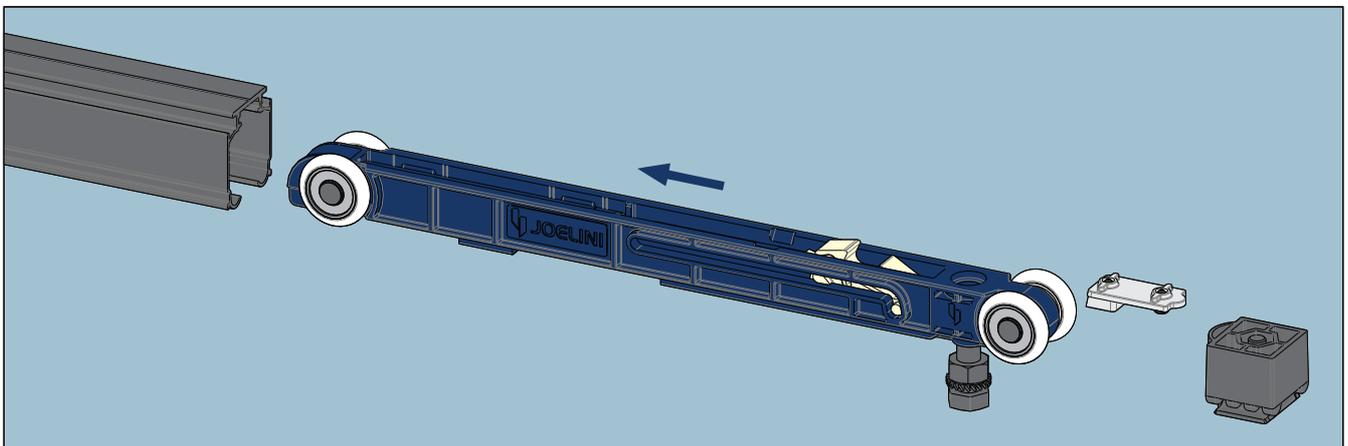

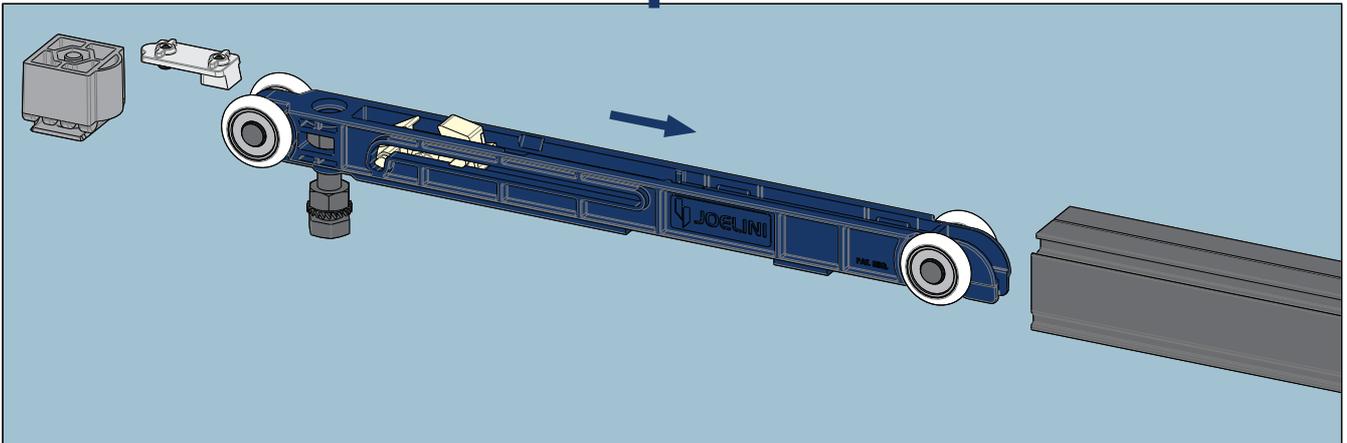

Montagem do tope/ batente:

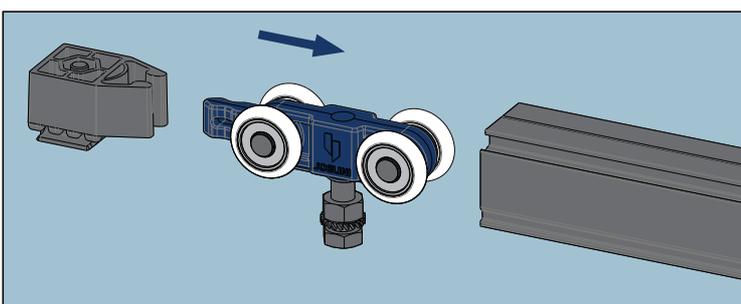

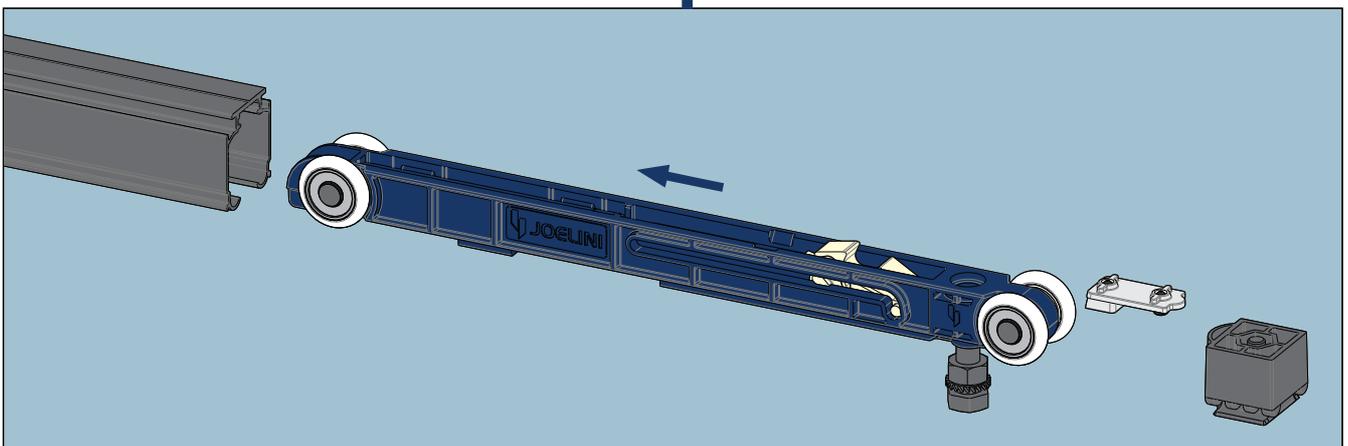

Sequência de montagem

Kit amortecimento duplo:

Kit amortecimento simples:

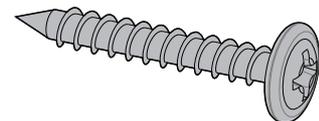

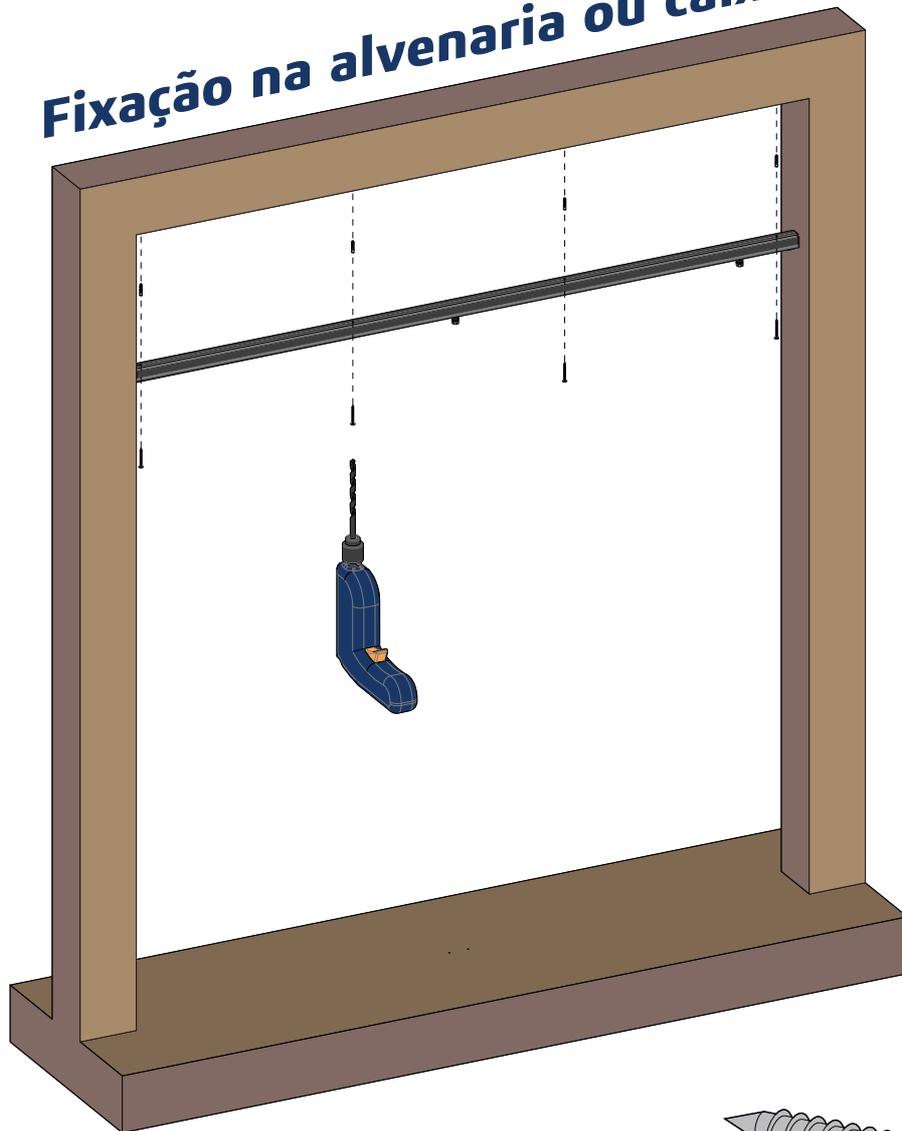

Fixação do trilho com ferragem

Fixação interna:

Bucha N6

Fixação na alvenaria ou caixaria

Parafuso CF 4,5x50
